

NOAH'S ARK

\$4000 - \$7000

While brainstorming for my Noah's Ark bunk bed design, the first thing that came to mind was the dream's of my sister and I when we would beg for bunk beds as children. Whenever we were staying somewhere with bunk beds, my sister slept on the top, and I took the bottom bunk without hesitation. In this project, I hoped to make the bottom bunk as interesting and playful as the top, despite the variations in height. I always felt as though the design of the top bunk was restricted by the short distance to the ceiling, and the bottom bunk was always most convenient.

However, my sister enjoyed the view from the top of the bunk beds, despite sleeping so high from the ground. I thought the nautical theme was perfect for my ideas since it easily had dual-levels with the balcony and steering area.

As I continued, I was constantly thinking of how I could transform both levels into a boat in real life. The rope ladder, ship wheel, and glass panels seemed to complete the theme while maintaining the functionality and convenience I enjoyed. The Walnut Veneer Plywood appears rustic similar to a boat and provides support for the numerous shelves and beams. This design leaves space in the rest of the bedroom, while allowing the children to have fun on the bunk beds.
